

DIRECTIONS FOR USE

PART NUMBER: 6000803

PRODUCT: BAER BRAKES DOT 4 BRAKE FLUID

REVISION: REVISION A

REVISION DATE: 21 JANUARY, 2025

**READ BEFORE USE!**

•Notices – Read and follow these directions for use before using Baer Brakes DOT 4 Brake Fluid. It is recommended to read the entire back label of the brake fluid container before use.

NOTE: IT IS RECOMMENDED TO ALWAYS USE BRAKE FLUID FROM A FRESH, UNOPENED CONTAINER. OPEN CONTAINERS OF BRAKE FLUID ARE SUSCEPTIBLE TO ABSORBING MOISTURE OVER TIME, REDUCING ITS EFFECTIVENESS AND SAFETY. ALWAYS CHECK BRAKE FLUID BEFORE USE, EVEN UNOPENED CONTAINERS.

Directions for use: Carefully open brake fluid container, removing plastic lid and foil covering from container nozzle. Slowly pour Baer Brakes DOT 4 brake fluid into the master cylinder reservoir so as not to aerate the fluid. Ensure that the master cylinder is only filled to the MAX FILL line denoted on the side of the master cylinder. For vehicles equipped with the Baer ReMaster, refer to the filling instructions provided supplied with the unit, or visit [d8210843d722b03743771f91d98a3f00cbc0bf7f.pdf](https://www.baer.com/d8210843d722b03743771f91d98a3f00cbc0bf7f.pdf). Continue with the brake bleeding procedure after filling the master cylinder to ensure any and all air is purged from the braking system.
